ING COLLEGE WEEK - 40 GAMES! COLLEGE POWE Week One 28-13 68% L E 4.5★'s TH IS W **NEWS AND NOTES - WEEK ONE, 2011**

Each week in Power Plays, we cover the front page with our News and Notes. We recap LW's misleading final scores and provide hard to find information on the previous week's games. We are writing this issue earlier than usual so, in place of N&N, we will provide you with some updated info for our '11 publications. The College Football Scorebook is BY FAR the most informative College Football Scorebook on the market today with over 300 pages PACKED with information. It has more than TWICE the amount of info of any other college football publication. The cost (through our office 1-800-654-3448) is just ^{\$}29.95, plus ^{\$}10 for shipping. It contains a complete Past History Section with LY's game recaps! We also rely on Phil Steele's 2011 College Football Preview Magazine to analyze teams. One feature that separates Phil's magazines from the competition are his projected starting lineups which give you a solid bio of every player in the 2 deep (sometimes 3 deep) including not just a name but height, weight, jersey number and stats. PhilSteele.com was kind enough to allow us to reprint this list.

These are noteworthy changes to the publications since presstime (AFTER all spring practices):

These Power Play Forecasts are the most unique in the country because they are based on Northcoast Sports' Private Power Ratings. Our ratings are unlike

any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, in 1992, Washington's defense vs the rush was rated at a "110" (From 1-100). They faced Colorado and allowed 183 yds rushing and dropped 12 spots in the national rushing defense ratings. However, Power Plays took into account the potent Buffalo run attack and had forecasted the Huskies yielding 225 yds. Due to the fact they did better than the forecast, Power

Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example was Michigan vs Purdue in 1989. Michigan held Purdue to just 45 yards rushing and improved their ratings in rushing defense in the national sta-tistics. However, our ratings had them rated at a 102 and moved them down to 99, as they should have yielded just 32 yards to an impotent Purdue rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run **you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have!** The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are **counted** into national ratings, **but not in Northcoast Sports' Power Ratings**! Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our

Power Ratings reflect the conditions and do not give excess credit to the defenses. Injuries: When South Carolina played NC State in 1989, South Carolina QB Todd Ellis was injured on the third play of the game. His backup, who had seen very little action all year, was not prepared and hit on just 4 of 13 passes for 65 yards. The offensive coordinator did not risk any passes. In the national statistics NC State's pass defense MOVED UP 14 NOTCHES. In Phil's Power Ratings they **stayed the same**, as the low yardage WAS NOT reflective of an outstanding performance by the defense

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in. Successful Unbalanced Attacks: In 1989, Ohio St was held to 127 yards passing vs Northwestern. This dropped OSU in the national passing offense ratings RAISED the Wildcats in the pass defense ratings. In our ratings the two units remained rated the same. Why? OSU rushed for 456 yards & DID NOT HAVE TO PASS & when they did they hit 9 of 11 passes, which is VERY effective. While Northwestern's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

ning is simple: log on to ncsports.com and fill in the information on the front screen

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have shown in recent years, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

COLLEGE FOOTBALL September 1st-5th, 2011 NOTE: Power Plays - PP

Welcome to this week's issue of Power Plays. The Power Plays Newsletter consists of forecasts that are made by a special Power Plays rating system. This is a system developed many years ago and we regard it very highly. In our final analysis of the plays the Power Plays forecast takes up anywhere from 25 to 30% of our total analysis. You will see in the Power Plays Newsletter in the write-ups that we agree with the majority of the Power Plays forecasts. However, there are times when we will disagree with the Power Plays forecast. We want to make it clear that this is the Power Plays Newsletter and these forecasts are based purely on the power ratings. You should never use just one method, system or angle to determine your handicapping. The times that we disagree with the Power Plays Newsletter we will clearly note it. If the Power Plays rating is strong enough to be a 4 \star Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's Power Plays Selections.

Dhio St figures to have an "us versus them" mentality this year and has taken home six straight Big Ten Titles but is not the favorite this season. Akron comes in at #120 on offense and #116 on D in our ratings and PP calls for the Buckeyes to win this by almost 6 TD's and the spread is under 5 TD's. That makes this a 4* play.

In Power Sweep we forecast the home team, Houston, to win by 3 but with the spread over a FG UCLA is worth a look as PP calls for the Bruins to win outright 32-30 although Houston will have a 34 yd edge. This is one of the more intriguing games of the opening weekend and anything over 3 points says to side with the dog.

Last year Minnesota got a garbage TD with :11 left to cover by a half point at home in a game that USC missed three 2 pt conversions which also cost them the spread. NOTRE DAME	137	325	33	+1*	~

The number surprised us a little here as we had the Irish pegged as a 10 pt fav and that's where the game has opened. USF has a lot of technical advantages as well as the fact that Holtz is an '86 ND grad and this game is special to him after he's coached here. PP calls for ND to win this by 17 and have a 462-258 yd edge. We like ND by 10 so no play

The Sooners have a bye next week and Tulsa lost their HC and OC from LY. OU is dominant at home averaging 523 ypg while TU allowed 482 ypg on the road last year.
