THE MOST UNDOUE POWER PATINGS IN THE COUNTRY These Power Play Forecasts are the most unique in the country because they are based on Northcoast Sports' Private Power Ratings. Our ratings are unlike any ATS WINS OVER	ERS
computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Auburn 6 Eastern Mi Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:	h 6 5
Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense over the vast was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Kansas St. 4 Virgina Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Temple 4 Hawaii Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. North Texas Wisk 3 Southern N Wisk 4 Wisk 4 Southern N Wisk 4 Southe	
country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Oklahoma St 3 Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.	4 3 St 3
Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and North Carolina 3 allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in NorthCoast Sports' Power Ratings! Duke 3 Houston Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Alabama 3 Clemson	3 St 3 3 3 3 3 3 3
Power Ratings reflect the conditions and do not give excess credit to the defenses. Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared Northern Illinois 3 Alabama Utah St	
and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Northcoast's PR ULM 3 UND they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the D. Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in. Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.	. KS 6 5
Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO PET V ON THE DRSC & when they did they bit 19 cm and the same learned rated around the same and in the pasting and they did they bit 19 cm and they bit 19 cm and the same learned rated around the same and they are they did they bit 19 cm and they are defense and they are defense around the same learned rated around the same and the same learned around the same and they are they did they bit 19 cm and they are defense around the same learned the same learned around the same learned around the same learned the same learned around the same learned the same learned around the same learned around the same learned around the same learned the sam	n 4 4

Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the DI results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are c input. The numbers in parenthesis are a comparison of the teams rankings (Visitor, visitors offense ranking vs home (D defense ranking, Home home offensive ranking vs visitor defensive ranking) over each teams last 4 games.

WAS beat SD last week but AF's off a home OT win are only 6-14-1 ATS and aside from OAK they have given up 38 ppg on the road this year. WAS has gone Over S 3 straight as Griffin gets his footing playing catchup to his defense leaking yards. They get an OAK MIA team that is 2-8 ATS on the East Coast who won't have RB McFadden (hamstring) here. PP only TAM gives the Giants an 85 yd edge but the Giants are a veteran team that should make the most (MIA #27 vs TB #22, TB #18 vs MIA #11) - After MIA's defeat of CIN it was forgivable to dismiss of having taken a step back, taking a deep breath and getting ready for the second half of the this as an easy win for the Dolphins. Payton has extra nd interest with DAL being where he got his career spark as an OC. DAL has covered 6 of 7 as a if he starts here he's essentially starting his 2013 season all over again. PP has this at the line dog and will be out for revenge after a 34-31 loss at home last year which kept them out of the playoffs. Get the Sunday Night Marquee Winner!
