These Power Play Forecasts are the most unique in the country because they are based on Northcoast Sports' Private Power Ratings. Our ratings are unlike

any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed just 256 yds rushing and **dropped 5 spots** in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays. Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and

allows 93 yards passing for a TD vs its fourth string defense. These yards are **counted** into national ratings, **but not in Northcoast Sports' Power Ratings**! Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our

Weather: If a game is played in hiserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses. Injuries: When Missouri played Vanderbill last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense. Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in. Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE POSP & when the weight the view of 22. While Houston's passing offense ratings are defensed acod in the participation of parts are defensed land and the participation of the Top 12.

PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

WER 15 31 n H The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season

changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have shown in recent years, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

NOTE: Power Plays - PP COLLEGE FOOTBALL September 18th-20th

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4 \star Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

Normally Power Plays puts out several 4.5 \star rated plays on any given week. However, this week we would like you to note that we are releasing just one 4.5 \star . Note that we are not here to "push" plays out or to create stronger plays that do not warrant a higher ranking and look forward to even more 4.5 \star winners in the upcoming weeks of the season. Thank you.

STL got a nice win LW as they overcame an almost hour long delay, blocked a punt & FG while overcoming a TB team without RB Martin & most of their DL. DAL took the ball out of Romo's hands & let RB Murray (167 yds 5.8) to the bulk of the work which kept the DAL defense safe. A domed environment plays to the Cowboys strengths on offense & STL is likely to be w/o their deep threat in Tavon Austin (knee) here. PHI is off their MNF effort vs IND which is their true litmus test vs a quality offense after their slow start vs JAX. They went into the game down 3 starting OL which could be a major issue vs a WAS pass rush that pulled in 10 sacks albeit vs JAX. WAS gave Cousins 1st string reps all thru camp & the start of the year to be safe & it paid off handsomely. While its only 2 games its not a good sign that the Giants have the #30 offense with just 2.7 ypc on the ground to help a QB transitioning to a completely different system. Its square pegs in round holes sustained even more injuries w/ RB Charles & SS Berry both being taken out w/ ankle injuries. PP with the personnel on hand offensively right now for them. HOU is still working with the core of a team that was expected to go deep into the playoffs in 2013 esp their defense. While not gifted physically, Fitzpatrick's football IQ makes him adequate. This is a bad time for the Vikings to visit w/ the Saints off B2B losses despite having the #2 offense in yards & points. NO's defense hasn't been able to close the door the 1st 2 Wks & while Peterson has been reinstated the team will have to deal with his fallout here. PP gives NO a 125 yd edge here & NO is 4-0 ATS as a DD fav w/a 43-15 avg score but the prospect of facing an angry Peterson aren't overly enticing here so we'll limit the grade. 3★ SAINTS 34 VIKINGS 17

TEN struggled once DAL took away the ground game as the Titans aren't built to of bottling up Rodgers LW until they lost their cool in the 2H. Ryan is 5-1 SU/ATS at home off a SU come from behind at this time. The Browns are punching above their weight over the L6 Qtrs despite not having their #1 RB, T or WR on the field. Their defense & home crowd were the keys in their upset of NO & they now get BAL team they know well. OC Shanahan runs the same exact offense as Ravens OC Kubiak & CL expects to get TE Cameron (shoulder) back here. The Packe overcame a slow start after their extra rest to beat the Jets at home & are getting a DET team that very thin in the secondary right now. GB held the Jets to 7 FD/100 yds in the 2H & this is a defense to 2H & this is a defense that is better suited to DET than CAR. After two games Carr is not the problem for the Raiders as they can't run the ball (126 yds 3.9 57 are Carr's) or stop the run 400 yds (5.0). The problem with stocking the roster w/ older vets that had success prior is that they have their money in hand & once games go sour they let up. The result is what happened vs HOU LW. OAK gave up 77% comp to Geno Smith & Fitzpatrick which is not promising with Brady in his home opener here. SF blew a 17-0 lead to open their brand new stadium but the stunning part is that their 129 yds rushing was just 11 yds more than the penalty yards they gave up. SF outgained CHI by 145 yds but 4 TO's converted into 14 pts is hard to overcome. Its unknown if Palmer (shoulder) will get the start here with Stanton securing a road win to put ARZ atop the NFC West. SEA was ground down by the heat & humidty in SD LW with the defense being on the field for over 42 min of LW's game. SD shut down the ground game (Lynch 36 yds 6.0) then forced Wilson to stay in the pocket & make his reads. DEN retooled its defense after the SB 48 lesson but it remains to be seen if their run game can make SEA play honest vs the pass here. Μ The fact that both teams have injury issues so early in the season is a concern with the Dolphins down all 3 starting LB's LW. The Bills took advantage of the shift in special teams depth with for a 102 yd KR for a TD & ground out 113 yds (3.4) to take the pressure of Manuel. PIT may have the edge of extra rest but the fact they gave up 183 yds (6.1) & 157 (4.4) in B2B weeks is a concern vs a mobile QB like Newton. CAR is 9-1-1 ATS at home but PIT is a veteran team that knows how to recover & press on. PIT also has their own ground game with RB Bell (168 yds 5.3) & the offense is better suited to a physical game than the Lions.
