WILL BEGIN AFTER WEEK 3

Power Ratings. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards. Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings!

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have

2014 COLLEGE POWER PLAYS RANKINGS

Listed below are Northcoast Sports' Power Play Rankings. These Power Play Rankings are unique. Our rankings are unlike any computer ranking, as we take into account all the following: Strength of Opponents, Individual Units (Rushing Offense, Rushing Defense, Passing Offense, and Passing Defense) Garbage Yards, Weather, Injuries, Home Field Edges, and successful Unbalanced Attacks. Regular rankings based solely on numbers DO NOT take into account these factors:

2014 TOUGHEST OPPONENT UNITS FACED

WHAT ARE THE TOUGHEST OPPONENT RANKINGS?

These rankings go far beyond the NCAA's straight statistical ranking of each team. For example in '12 Notre Dame ranked #89 in the NCAA in rush defense allowing 170 ypg, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush offenses in the NCAA in '13. As you can see, the NCAA's statistical rankings can be misleading. In the upcoming weeks we'll provide scanples of this year's statistical disparities. These are the current rankings for this year. Here are the teams that have took on the toughest & easiest schedules last year.

NOTE: Power Plays - PP

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4* Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

ALABAMA	614	340	275	44	-1	V V V V

The Tide have large projected edges in their home opener (614-170 yds) but the 39 pt victory lands them right at the opening line as we'll pass in this matchup.

While the Cyclones did drop LW's opener to an FCS squad, keep in mind that it was no ordinary lower division tm as 3x FCS Champs NDSt could easily knock off plenty of FBS tms. PP calls for ISU to stay within the elevated spread in this one and we agree

Newton (ribs) didn't workout for most of the offseason & while he's fully expected to start he's may not get a full set of reps. He has a weaker support system esp at WR/OL which is bad defense stands to regress a bit after 2013's #4 finish but they have the edge here. While both WR's Jones/White are healthy who is going to handle TE Gonzalez's 83 rec's? PP has this right around the line making it a No Play for both the side & total.

Ty. PP calls for STL with the yards & pts here but we want to see how Shaun Hill works out as with QB Bowman (PUP) out. SF has their best WR unit that Harbaugh's had here & the OL is complete Ty. PP calls for STL with the yards & pts here but we want to see how Shaun Hill works out as with QB Boone (holdout) returning. SF has their official opening at Levi Stadium vs CHI on death of the state & DAL is 11-3 ATS as a dog of 3 or more. PP calls for this to be a fairly close game despite the yardage & its worth a small look.

DEN reloaded after their crushing SB loss to be more of a defense like SEA in adding DE Ware.

IND isn't the deepest team in the league but Luck's 4th Otr comebacks has them a decent 10-6

ATS as a dog. Will Manning get revenge for LY's loss at IND or will Luck steal another win on SNF's opening week? Get the Sunday Night Marquee Winner! Available on gameday after 11 am

a starting RB & pair of WR's who weren't with the team in 2013. Henne simply doesn't have the horses to compete with PHI's up-tempo offense. DD non-Div fav's are just 5-5 ATS in Wk 1 & fense & DET going to the more conservative Jim Caldwell as HC. DET will be pumped as this their road game at IND on MNF may cause some lookahead so we'll limit the grade here. PP has them keeping this close to the line so No Play.

These teams played against each other in pre-4 as each was happy to simply avoid injuries. supporting unit vs an OAK team coming cross country in a 10 am Pacific start. The Jets defensive front 7 is underrated, at home with a manageable line & we'll side with them here.

SD has opened on MNF in Wk 1 for 4 of the L5Y so they know the routine. ARZ's offense should be improved over LY with Palmer having a real OL to protect him now. Is also a solution of the chargers and the solution of the chargers and the solution of the chargers are also become and the solution of the chargers and the solution of the solution secondary improved enough to handle the Floyd/Fitzgerald tandem or will ARZ's defense get gashed by a deep SD RB unit?
