WILL BEGIN AFTER WEEK 3

These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Carbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is shead 63-0 and allows 93 yards.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings!

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings

reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points

allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have

shown in recent years, which has been our actual compu					rower hallings.	mese	are Noi	ilicoasi opolis i	rius oi i	VIII IUS F	Jwei Halligs.

Listed below are Northcoast Sports' Power Play Rankings. These Power Play Rankings are unique. Our rankings are unlike any computer ranking, as we take into account all the following: Strength of Opponents, Individual Units (Rushing Offense, Rushing) Defense, Passing Offense, and Passing Defense) Garbage Yards, Weather Injuries. Home Field Ednes, and Successful Units (Rushing Offense) Beautiful Successful Units (Rushing Offense) Do NOT lake into account these factors.

WHAT ARE THE TOUGHEST OPPONENT RANKINGS?

These rankings go far beyond the NCAA's straight statistical ranking of each team. For example in '12 Notre Dame ranked #89 in the NCAA in rush defense allowing 170 ypg, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush offenses in the NCAA in '13. As you can see, the NCAA's statistical rankings can be misleading. In the upcoming weeks we'll provide examples of this year's statistical disparities. These are the current rankings for this year. Here are the teams that have took on the toughest & easiest schedules last year.

NOTE: Power Plays - PP COLLEGE FOOTBALL September 11th-13th

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4★ Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

Just a quick note for our Power Plays Subscribers. Obviously this newsletter is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers here are based upon how they finished last season with adjustments made due to personnel changes. Preseason statistics are not included in any of the projections as we do not feel they would accurately adjust the numbers.

BALTIMORE	369	96	273	26	-2	#4

Its not a surprise PP has this game pegged w/a FG difference with 9 of the L10 meetings decided by that much. Look for BAL to reduce Flacco's rollouts from here on out & put more emphasis on the run game after PIT gave up 183 yds (6.1) on the ground to CLE. Lost in PIT's close win vs CLE is that RB Bell had 197 total yds (7.3) vs a good defense. PP has this at the line making it a No Play.

Both teams earned wins over quality foes LW with BUF relying on TO's & MIA smothering NE in the 2H. BUF is just 4-13 SU/ATS after a win & while they have the defense to give MIA's OL a challenge at the POA the Dolphins defense isn't bad either. PP leans with the home team here but we aren't sold on either QB as we need to see consistency out of both. This is a No Play here.

Overall the DAL defense wasn't that bad vs SF they were just put in bad spots by Romo's errors as 4 TO's setting up 21 pts. Locker was solid vs a depleted defense & PP thinks that the Titans will have the same success at home here. Whiz put 30 up on the same DAL defense with SD LY & while Locker isn't Rivers this DAL unit is actually at a lower level than LY (1 sk, 1 tfl vs SF). PP sides with the home team w/a 92 yd edge working with a reasonable line & we agree.

known how the Giants OL fared in its 1st real action or if Manning has adjusted to a short passing attack after working in a vertical system previously. ARZ's defense is also a major question with 3 key players (Dockett, Washington, Dansby) gone from LY's team as well as FS Mathieu's status so this is a No Play.

The Vikings throttled a STL team working with its 3rd string QB who took 4 sacks & threw a pick-six. They now face an angry Patriots team that is 6-1 ATS on the road off a SU loss. PP calls for Brady to put up a healthy amount of yards here & PP is overreacting to the results of both teams games LW. 2 starting OL went down to inj's (LG/RT). IND showed their competive fire LW vs DEN w/a 271-87 yd edge in the 2H. PP has this at the number right now so its a No Play.

NO was the 21st team to allow 500+ yds in an opener but they now get a CLE team that may be w/o #1 RB Tate & #1 receiving option TE Cameron. CLE had a 20-8 FD & 288-126 yd edge in the 2H vs PIT which shows that Hoyer can run this system once Shanahan cuts it loose. NO is much better than LW's events & the public will be all over them to correct this week. But NO is 5-9 ATS as a NDIV AF & 1-4 ATS away off a SU loss. PP leans with the road team but we want to see CLE's injury list & with the outside chance of Gordon returning this is a No Play.

ATL flexed its muscle offensively w/a great game by Ryan (448 yds 72% 3-0) but they really lucked out as was int'd in the end-zone which turned into a 14 pt swing. ATL also recovered a fumble in early OT to set up the game winning FG & now they travel to CIN who gained a good deal of confidence in hanging on to beat BAL. They did lose receiving TE Eifert (elbow) & stud LB Burfict (concussion) & both are expected to miss here. CIN is an impressive 11-1 SU/ATS at home but PP has this right around the line so No Play.

STL looks to be in for a nightmare season being forced to play their 3rd string QB LW due to injuries & possibly starting him on the road vs another team that was beat up physically. STL actually had 100 more yds w/ Davis than Hill LW while TB is dealing with their own issue particularly on the OL & the unknown status of RB Martin (knee). Both teams are deep defensively & the QB situation for STL makes the side a No Play but we'll side with PP here for the Total.

In SEA's L4 games they have taken down, Brees, Kaepernick, Peyton & Rodgers allowing just 66 pts & 233 ypg pass (64%) w/a 4-5 ratio. They now have extra time to prep for SD coming off a MNF game at ARZ which aside from the sked diff also works for SEA as they compare what SD did vs a Div foe. OAK had 9 of its 1st 10 sustained drives end in a punt w/ just 1 earning over 30 yds behind Carr. The Jets slammed the door on any sort of run support (25 yds 1.7) for the young QB & now he has to face a HOU team w/a deeper defense led by the BEST defensive player in the NFL. OAK's OL is worse than WAS's & while we don't normally endorse revenge plays in the NFL the Texans remember losing 28-23 as a 9 pt HF LY. PP gives HOU more than enough yds here but with this being O'Brien's 1st road game after his 1st career win we'll limit the grade.
