THE MOST UNIQUE POWER RATINGS IN THE COUNTRY

These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and **dropped 5 spots** in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run **you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have!** The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are **counted** into national ratings, **but not in Northcoast Sports' Power Ratings**!

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they **went from #11 dropping out of the Top 15**, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units **remained** rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have **the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors.** Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

NORTHCOAST SPORTS PLUS OR MINUS POWER RATINGS

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and **they differ from what we have shown in recent years**, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

2015 COLLEGE POWER PLAYS RANKINGS

Listed below are Northcoast Sports' Power Rankings. These Power Play Rankings are unique. Our rankings are unlike any computer ranking, as we take into account all the following: Strength of Opponents, Individual Units (Rushing Offense, Rushing Defense, Passing Offense, and Passing Defense) Garbage Yards, Weather, Injuries, Home Field Edges, and successful Unbalanced Attacks. Regular rankings based solely on numbers DO NOT take into account these factors.

2015 TOUGHEST OPPONENT UNITS FACED

WHAT ARE THE TOUGHEST OPPONENT RANKINGS?

These rankings go far beyond the NCAA's straight statistical ranking of each team. For example in '12 Notre Dame ranked #89 in the NCAA in rush defense allowing 170 ypg, but ranked #40 in our rush defense rankings because they faced the toughest schedule of rush offenses in the NCAA in '13. As you can see, the NCAA's statistical rankings can be misleading. In the upcoming weeks we'll provide examples of this year's statistical disparities. These are the current rankings for this year. Here are the teams that have took on the toughest & easiest schedules last year.

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4★ Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers in parenthesis are a comparison of the teams rankings (**Visitor, visitors offense ranking vs home defense ranking, Home home offensive ranking vs visitor defensive ranking**) over each teams last 4 games.

ST LOUIS	372	102	270	23	-1	#1

While the Steelers were able to blast the 49ers at home via the scoreboard, the final yardage totals were fairly close (453-409). PP calls for a tight contest in this matchup with PIT getting a slight yardage & point differential. STL has proven to be a different animal at home however so we'll pass.

Both teams enter the week at 1-1 with MIN picking up a home win over DET LW and SD dropping their visit to CIN. The yardage (Chargers) and points (Vikings) are split in this meeting and while PP gives MIN the 4 pt victory, the opening line is close enough to make this a No Play.

Huge situational edge for the Texans off of B2B losses against a Bucs team that got a huge outright upset (+10) on the road LW against the Saints. PP forecasts an easy win for HOU as they are projected to outgain TB by nearly 100 yds in their 10 pt win.

Teams heading in opposite directions in this one with the Panthers off to a 2-0 start following LW's home win over HOU and NO still winless after losing as a 10 pt HF vs the Bucs. PP sides with the HT in this one and we agree as the Panthers are forecasted for a 51 yd edge and a 9 point victory.

JACKSONVILLE	306	103	203	11	-2	#5
NEW ENGLAND	448	96	352	34	+2	#6

PP projects this contest as the largest MOV in Wk 3 as the Patriots are forecasted for a 23 pt win with a substantial 448-306 yardage edge. JAX is fresh off of an upset win at home vs MIA but their 1st road trip of the ssn appears to be a doozy vs a NE team that has a bye on deck (5-1 ATS prior) and will be looking to make a continued statement in this one.

BALTIMORE	375	132	243	21	-2	#11

The Bengals have won and covered 4 of their past 5 contests against the Ravens. They are riding some solid momentum as they're off to a 2-0 start (1st time s/'06) and are projected for not only a yardage edge, but also the outright upset. BAL is 0-2 for the 1st time under Harbaugh and with a short week ahead (PIT on TNF), we'll agree with the forecast and back the visitors.

CLEVELAND	384	119	265	24	-1	#31

ATLANTA	362	52	310	18	+1	#3
DALLAS	457	141	316	27	-2	#25

While PP doesn't take the Cowboys' injuries into the final numbers, it's actually impressive to see how much of an edge they are forecasted for against a fellow 2-0 team. DAL is projected to take home a 9 pt win with a 457-362 yd edge and we agree despite Weeden taking over at QB. Teams generally rise up the next week following a significant injury on their roster and deliver solid performances.

SAN FRANCISCO	329	96	233	10	-1	#2
ARIZONA	358	94	264	31	0	#12

The Cardinals have delivered B2B dominant outings to start the ssn and PP projects that trend to continue here with a 21 pt win. SF's yardage forecast may be a bit skewed as they took on a porous Steeler defense a week ago where they posted 400+. ARZ has the best spread record in the entire league over the past 3 seasons and should deliver once again this weekend.

CHICAGO	270	62	208	14	-1	#32
SEATTLE	402	171	231	35	+1	#14

While it's not much of a surprise to see the Bears off to an 0-2 start, the Seahawks 2-game skid to start the ssn is a bit of a shocker. They finally return home following trips to STL and GB where they've gone 18-7 ATS as a HF. PP calls for a massive 21 pt win against a Bears squad that could be missing QB Cutler. With no line as of presstime, we'll reluctantly pass as there may be some value here.

Both teams head into this contest with identical 1-1 marks although the strength of schedule thus far certainly favors the Bills (IND/NE compared to WAS/JAX for Miami). PP calls for the road team to take home a 2 pt win but with a close yardage edge and curiosity on how each will act following a loss, we'll make this matchup a No Play.

The Broncos escaped Arrowhead with a 7 pt victory thanks to some late miscues by the Chiefs. DET is now home for the 1st time in '15 although the 1st 2 weeks have seen them blow a big lead to SD and drop a road contest vs MIN. While PP calls for a 10 pt win by DEN with an 88 yd edge, keep in mind that the Lions have outscored DEN by a 89-17 margin in their past 2 meetings. **Call your Northcoast VIP Card after 11am EST on gameday (just $12). GB is off to a 2-0 start and PP projects that run to continue as they are forcasted with a 403-361 yd edge and an 8 pt win. With no line as of presstime, we'll pass on this one.
