These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbange yards' These are varied that them coins or ellows in the first stricts of the power in

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings!

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can s

# NOTE: Power Plays - PP COLLEGE OCT 1st - 3rd

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4 $\star$  Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections.

Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers in parenthesis are a comparison of the teams rankings (Visitor, visitors offense ranking vs home defense ranking, Home home offensive ranking vs visitor defensive ranking) over each teams last 4 games.

WASHINGTON	368	97	271	18	-5	#29

The Eagles have yet to get their offense firing on all cylinders despite their 1st win last week. WAS meanwhile has outgained each of their 1st 3 opponents despite their 1-2 mark. PP calls for another Redskins yardage edge although the score falls in favor of PHI.

CINCINNATI	388	137	251	21	<b>±</b> 2	#10

KC may very well be heading to Cincy w/a 1-2 mark (MNF results not available as of presstime) while the Bengals are off to their 2nd straight 3-0 ssn. It's a bit surprising that PP is calling for narrow edges in both yardage and the final score for the Bengals as they clearly look like a playoff contender.

SD returns home following a pair of road defeats at CIN and MIN while the Browns failed to deliver as a HF against the Raiders LW. PP is forecasting a nice outcome for the Chargers in this one with a 447-304 yd edge and an 11 pt victory. We agree as the Bolts get back on track here.

It can't get much worse for a 49ers team that gave up a combined 90 pts the L/2 wks against PIT & ARZ on the road. Fortunately they are now back at hm where they delivered a nice victory on MNF in Wk 1 against MIN. GB is on a short wk following MNF and with no line as of presstime, we'll pass.

DEN is 3-0 for the 2nd time in 3 ssns following another road win against a caliber opponent. Their 17-7 ATS mark as a HF and solid projections in both yardage (+97) and score (26-17) has us feeling good about making them our top weekly play in Power Plays for Wk 4!

The Cardinals handled the 49ers with ease LW delivering a winner for our NFL GOM! While PP projects another solid victory for ARZ, we're a bit surprised that the Cardinals aren't forecasted with more offense after avg 42 ppg and 391 ypg through the 1st 3 wks. Regardless, ARZ earns a nod as a 3★ selection for this upcoming weekend.
