These Power Play Forecasts are the most unique in the country because they are based on **Northcoast Sports' Private Power Ratings**. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected:

Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Plays

Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays.

Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings!

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit Injuries: When Missouir played vanderbilt last year, Tigers QB James Frankili was injured early in the game. His backup, who had seen very little action (FF), was not prepared and nit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in.

Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH!

There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and they differ from what we have

chown in ro	set to you as a base power ratings to forecast up comming lines and sterigin to opportenis, etc. Once again, they are not based on Fower Priays and they unler from what we have we not not be set to the cash of the principle of

NOVEMBER 9TH-12TH The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4* Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP Selections. Power Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers in parenthesis are a comparison of the teams rankings (Visitor, visitors offense ranking vs home defense ranking, Home home offensive ranking vs visitor defensive ranking) over each teams last 4 games.

the Jaguars. The Panthers meanwhile have started a mini-streak of their own following their bye week forecasted win and a 453-247 yd edge after consecutive wins vs ARZ & LA. While the points are forecasted to be in favor of the visiting Chiefs, the yardage edge goes to the Panthers. No Play.

DEN moved to 3rd place in the AFC West at 6-3 following their road loss LW to OAK. They now head to the Superdome where the red-hot Saints have avgrd 33 ppg & 470 ypg this ssn. While PP calls as the favorite at presstime, there's no question which play earns the 4* honors this weekend. for a 1 pt DEN victory, we like the home squad here as they are projected with the yardage edge.

NO PLAY: DENVER 27 NEW ORLEANS 26 Ttl Yds Rush **Pass** Points **LOS ANGELES** 283 51 232 13 -3 NY JETS 109 201 19

Offense is expected to be at a minimum in this matchup between the 26th (NYJ) and 32nd (LA) ranked scoring tms. While PP does call for the Jets to claim a 6 pt victory, it's hard to lay the spread with either team at the moment

Ttl Yds Rush Pass **Points** TO's ST's **ATLANTA** 409 134 275 +3 **PHILADELPHIA** 341 88 30 253 +6

While the Eagles are back at home following a rough road trip to DAL & NYG, it's worth mentioning that they've been extremely consistent in Philly thus far in '16 with a 3-0 SU/ATS mark. PP projects a 1 pt win by PHI in this one but with the dog covering 10 of the L/11 in Falcons gms, we'll pass here.

Following a 5-0 start to the ssn and being mentioned as one of the NFL's elite, things haven't gone as planned for the Vikings since their bye wk as they've now dropped 3 straight. While WAS has done well recently with a 4-1-1 SU/5-1 ATS mark, they've been fortunate on the sked with some lighter opponents. With an 18-18 forecasted finish, we'll be happy to take the underdog Vikings in this one!
