\mathbb{R} RATINGS II TRAI ١ź

Northcoast Sports' Private Power Ratings. Our ratings are unlike any computer rating, as we take into account all of the following: Strength of Opponents Individual Units (Rushing Offense and Defense, Passing Offense, & Defense, Scoring Offense and Defense, Garbage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected: Defense, Passing Offense, & Defense, Scoring Offense and Defense, (achage Yards, Weather, Injuries, Home Field Edge, and Successful Unbalanced Attacks). Here is how each is reflected: Strength of Opponent: Our ratings do not just take the opposing team's overall power rating into account. For example, last year, Florida Atlantic's defense vs the rush was rated at 119. They faced Alabama and allowed "just" 256 yds rushing and dropped 5 spots in the national overall defensive ratings. However, Power Plays took into account the potent Crimson Tide run attack and had forecasted the Owls yielding 289 yds. Due to the fact they did better than the forecast, Power Plays raised their rating to 112 even though they slipped in the national (straight yardage) rankings. Another example last season was Wisconsin vs UTEP. Wisconsin held UTEP to just 77 yards rushing and stayed the same in the overall defense in the national statistics. However, our ratings had them rated at 15 and moved them down, as they should have yielded just 50 yards to a weak UTEP rush attack. Next time an announcer on TV tells you that a certain team is #3 in the country vs the run you better check Northcoast Sports' Power Ratings and see how good a rush defense they really have! The top twenty ratings in Power Ratings for each offensive and defensive category will be listed in each week's issue of Power Plays. Garbage yards: These are yards that a team gains or allows in the final minutes of a game when it has been decided. For example, Team A is ahead 63-0 and allows 93 yards passing for a TD vs its fourth string defense. These yards are counted into national ratings, but not in Northcoast Sports' Power Ratings! Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings

Weather: If a game is played in miserable weather conditions and is low scoring, the straight statistics credit the defense with outstanding performances. Our Power Ratings reflect the conditions and do not give excess credit to the defenses.

Injuries: When Missouri played Vanderbilt last year, Tigers QB James Franklin was injured early in the game. His backup, who had seen very little action (rFr), was not prepared and hit on 30%, 9-30 passes. The offensive coordinator simplified the offense. In the national statistics Vanderbilt's overall defense MOVED UP 8 NOTCHES. In Phil's Power Ratings they went from #11 dropping out of the Top 15, as the poor performance WAS NOT reflective of an outstanding performance by the defense.

Home Field Edges: The weekly projection of yards and points is weighted with the home field factored in. Successful Unbalanced Attacks: Last season, Tulsa was held to 155 yards passing vs Houston. This dropped Tulsa in the national passing offense ratings & RAISED the Cougars in the pass defense ratings. In our ratings the two units remained rated around the same. Why? Tulsa rushed for 350 yards & DID NOT HAVE TO RELY ON THE PASS & when they did they

hit 18 of 32. While Houston's pass defense looked good in the national ratings, only Northcoast Sports' Power Ratings reflected the TRUTH! There you have it. More than just numbers, THESE RATINGS REFLECT the true strength of each unit and allow them to have the most accurate forecast of yards gained and points allowed in the country! No other rating system takes into account all the previous factors. Next time you hear that a team is rated third in the country in pass defense, just remember, yards are not everything and Northcoast Sports' Power Plays will show you how strong the team really is.

SPORTS RTHCOAST PLUS NUS OR WER

The Power Ratings listed below are not based on the Power Plays, they are based on last year's final computer power rating numbers with the pluses and minuses from the off season changes factored in. They are then adjusted during the course of the season based on the final score of the games that are played on a weekly basis. The Power Ratings listed below can be used for you as a base power ratings to forecast up coming lines and strength of opponents, etc. Once again, they are not based on Power Plays and **they differ from what we have shown in recent years**, which has been our actual computer Power Ratings. These are Northcoast Sports Plus or Minus Power Ratings.

NOTE: Power Plays - PP COLLEGE FOOTBALL SEPTEMBER 15TH-17th

The Power Plays Newsletter consists of forecasts that are made by a special rating system. You will see in the write-ups that we agree with the majority of the PP forecasts. However, there are times when we will disagree. We want to make it clear that this is the PP Newsletter and these forecasts are based purely on the power ratings. If the PP's rating is strong enough to be a 4★ Play, yet we are on the other side of the game, we will clearly state that we like the other side of the game. With all that said here are this week's PP

PRO FOOTBALL SEPT Eth NOTE: Power Plays - PP

ower Plays is based upon statistical numbers and rankings that are used to develop the projections you see here. As with all types statistical information the more numbers that one inputs ordinarily the stronger the accuracy of the results. Therefore, one would expect the projections to be more reliable after a number of weeks worth of stats are input. The numbers in parenthesis are a comparison of the teams rankings (Visitor, visitors offense ranking vs home ARIZC) defense ranking, Home home offensive ranking vs visitor defensive ranking) over each teams last 4 games.

NY JETS	380	137	243	18	0	#30					
BUFFALO	271	67	204	12	+1	#5					

The Jets head to BUF off a narrow opening loss with revenge on their mind after being swept by former HC Ryan a ssn ago. While PP does project the Jets with solid point SEATT and vardage edges, keep in mind that the Bills are on a 7-2 ATS run at home. Grab this LOS A Thursday Night Marquee Winner on the VIP Debit System or with your Marquee Pack after Noon EST gameday.

TENNESSEE	358	99	259	19	-3	#28					
DETROIT	347	58	289	24	0	#18					

The Lions are off of a come-from-behind win over the Colts while the Titans fell flat following halftime (led 10-0) in their opener vs MIN. Pretty even forecast in this matchup as while PP is calling for the Lions to deliver a 5 pt win, the yards are actually in favor of the Titans.

KANSAS CITY	318	109	209	20	-1	#10		
HOUSTON	298	81	218	17	0	#23		

The Chiefs head to HOU for the 3rd time in just over a calendar year to take on a Texans squad that they've had some solid success against. PP projects that trend to continue again this weekend with the Chiefs winning outright as a small AD along with a small forecasted vardage edge

MIAMI 250 43 207 7	+2	#8

NE went to ARZ LW and pulled out the surprising outright upset with plenty of their starters on the shelf (incl QB Brady). MIA meanwhile nearly pulled out an upset of their own falling late in their battle with SEA. PP is calling for NE to get a substantial win here with a huge yardage edge and we agree!

BAL heads to CLE following a solid defensive victory at home vs BUF. The Browns meanwhile were clearly outmatched LW in PHI as they dropped their 12th consec ssn opener. PP is calling for the Ravens to hand the Browns an 8 pt loss with a big 400-233 yd edge this upcoming week.

PIT returns home on a short wk following their MNF trip against the Redskins. They now take on a CIN squad that survived against the Jets in the opener. While the PP forecast sides with the AD in this one, we'll pass on this matchup as we've yet to see a game from the Steelers.

The Redskins are at home for a 2nd consec wk to begin the ssn although they are on short rest following a MNF matchup. They now take on a DAL tm that fell just short LW vs the Giants. The final forecast in this meeting is near the opening line and we'll pass here.

Another shootout is expected in this one between a pair of tms that combined for 101 pts and 1,000 a year ago. PP is calling for the Giants to come out victorious and while we do agree that they should win outright, their inability to cover spreads as a favorite is a concern.

The Bucs went into ATL LW and came away with an outright upset win $(3.5 \pm LP Winner)$. They now take on a Cardinals tm that couldn't handle their role as a 7 pt fav against NE. With another line of around a TD, we disagree with the huge forecast edge by ARZ and feel that the outcome will be close to 7.
